

PROFESSIONAL SUMMARY

Full Stack Developer with **1.5+ years of experience building scalable microservices architectures** using **Java, Spring Boot, Node.js, React, and cloud-native DevOps tools**. Experienced in designing **high-performance APIs for systems serving with 10M+ users**, implementing **SOLID design principles**, and maintaining **90%+ unit test coverage** to ensure reliability and maintainability. Skilled in **event-driven systems, distributed caching, and secure API development** for fintech and customer communication platforms.

TECHNICAL SKILLS

Languages: Java, JavaScript, C++, C
Backend: Spring Boot, Spring Cloud, REST APIs, JPA, Hibernate, Microservices, gRPC, Multithreading, Exception Handling, Transaction Management
Frontend: React.js, Next.js, Redux Toolkit, HTML5, CSS3, Tailwind, Material UI
Databases: MySQL, PostgreSQL, MongoDB, Redis, Database Indexing
DevOps & Cloud: Docker, Kubernetes, Rancher, Argo CD, Jenkins, GitLab CI/CD
Security: JWT, OAuth2, Azure AD
Tools: Git, Jira, Postman, IntelliJ, Swagger(OpenAPI), Log4j, SLF4J, JUnit, Mockito
Concepts: Microservices Architecture, API Gateway, Idempotent APIs, SOLID Principles, Event-Driven Architecture, Distributed Caching, System Scalability, SSR, Facade Pattern, Agile/Scrum
Soft Skills: Problem Solving, Teamwork, Project Delivery

PROFESSIONAL EXPERIENCE

Digi Mantra Labs - Java Full Stack **December 2024 – Present**

- Created** RESTful APIs using Spring Boot, JPA, and MySQL for enterprise modules.
- Integrated** JWT-based authentication, global exception handling, and structured logging using SLF4J and Log4j.
- Engineered** reusable React components and connected backend APIs through Redux state management.
- Collaborated** in Agile sprints, participating in code reviews and Git-based CI workflows.
- Optimized** SQL queries and indexing, reducing API latency by **30%**.
- Documented** APIs using Swagger (OpenAPI) to support frontend and third-party integrations.

Coding Blocks (Summer Internship) - Web Development **June 2024 - July 2024**

- Built responsive web pages and mini web applications using React.js, HTML, CSS, and JavaScript, improving UI performance and user experience.
- Used Bootstrap and basic REST integrations to fetch and display dynamic data in frontend components.

PROJECTS

GCash – Fintech Microservices Payment Platform

- Tech:** Java Spring Boot, Next.js, Golang, Redis, Kafka, Kubernetes, Rancher, Argo CD, Jenkins, Microservices, Docker, Material UI, Facade Pattern, Jira, GitLab, Idempotency
- Designed and enhanced** a microservices-based payment platform (Payments, Users, Ledger, Notifications) using Spring Boot and Golang, supporting high-volume transactions for systems serving **80M+ users**.
- Established** event-driven communication using Kafka, improving system scalability and service decoupling.
- Introduced** Redis caching to reduce database load and improve API response time.
- Developed** secure idempotent payment APIs to prevent duplicate transactions in distributed environments.
- Applied** SOLID principles and modular architecture to improve maintainability and service extensibility.
- Achieved 90%+ unit test coverage** using JUnit and Mockito, ensuring service reliability.
- Containerized** services using Docker and **orchestrated deployment on Kubernetes** with CI/CD pipelines using Jenkins, GitLab

Earthlink – Customer Support & Communication Platform

- Tech:** React.js, Redux Toolkit, Fastify, GraphQL, Microservices, Microsoft Azure Auth, Google APIs (Calling & Maps), Formik, Material UI, Custom npm Packages (.npmrc), Jira, Bitbucket, API Schemas
- Developed** scalable React.js dashboard modules for managing customer tickets, profiles, and communication workflows.
- Engineered **GraphQL APIs using Fastify** to optimize data retrieval and reduce unnecessary network payloads.
- Implemented secure authentication using **Azure AD, JWT, and OAuth2** to protect APIs and user sessions.
- Integrated **Google Calling and Maps APIs** to enable location visualization and communication features.
- Developed dynamic forms using **Formik and Material UI** with validation workflows for ticket and feedback systems.

CERTIFICATION

• SQL Injection Attack	EC Council	November 2024
• Summer Internship - Web Development	Coding Blocks	June 2024

EDUCATION

Lovely Professional University Punjab, India	August 2023
Masters in Computer Application - MCA	CGPA: 8.00

ACHIEVEMENTS

Achieved 5-Star rating on HackerRank in C++ and 4-Star rating in Java, with 120+ active problem-solving days on LeetCode.
